

TARGET AUDIENCE

- Emergency Physicians
- Family Physicians
- Pediatricians

Description

This course teaches physicians how to reduce iatrogenic injury related to pediatric airway management.

Objectives

- Learn the stepwise approach of pediatric airway management.
- Understand the various airway techniques.

This is an Accredited Simulation Program (Section 3) as defined by the Maintenance of Certification Program of The Royal College of Physicians & Surgeons of Canada, and approved by the University of Calgary office of Continuing Medical Education and Professional Development. Remember to visit MAINPORT to record your learning and outcomes. You may claim a maximum of 8.5 hours (credits are automatically calculated). Claiming your credits: Visit MAINPORT <https://login.royalcollege.ca/oamlogin/login.jsp> to record your learning and outcomes.

Members of The College of Family Physicians of Canada can claim up to 50 MOC credits per cycle based on the policy within the new Mainpro+ system launched June 27, 2016. Claimed as Group Learning certified credits. 8.5 hours.

You will also learn...

- That airway management is a team sport.
- That bag mask ventilation is the most important, foundational life-saving skill.
- To avoid perseveration.
- That the LMA is an excellent first line airway and rescue airway.
- That oxygenation should always be your primary roll.
- The limitations of each strategy of airway management.

TPAC

A full day, multi-disciplinary workshop, for clinicians who manage acute pediatric patients

THE PEDIATRIC AIRWAY COURSE

Taught out of the Alberta Children's Hospital KidSIM Centre by Western Canada's top pediatric educators, TPAC is the perfect CME course for those who manage acute pediatric patients.

Upon arriving, you will find yourself in the largest state of the art simulation centre in Canada. Our specialty is pediatric simulation education and faculty development. The focus is hands-on teaching using the latest evidence-based medicine practices.

You will receive real-time, one on one feedback and gain experience using high-fidelity simulation scenarios that are expertly moderated and debriefed to maximize your learning experience.

Register at: www.pace4kids.org

Welcome to TPAC

This course is limited to 24 participants who will be coached by eight facilitators. Small group dynamics ensure you will receive optimal learning.

Our centre provides learners with surrogate clinical experiences using high-fidelity pediatric mannequins that mimic an as close to 'real-life' situation as possible.

I hope you will join us for what promises to be an engaging and enriching learning environment.

Vincent Grant, MD, FRCPC
Director, KidSIM

EXPERT INSTRUCTORS

Your instructors include anesthesiologists, intensive care specialists and emergency medicine specialists at the Alberta Children's Hospital
